Rubik Orbit · 1. Ciclo di 3 angoli dietro

8 passi, 8 quarti di giro sulle orbite. A sinistra il cubo visto dal vertice tra x, y e z positivi (destra, sopra, davanti), a destra dal vertice opposto (sinistra, sotto, dietro).

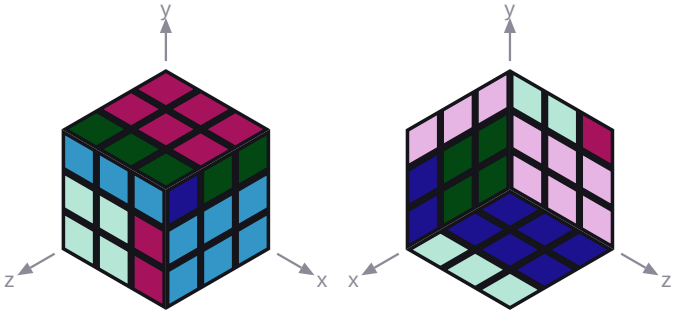

Partenza

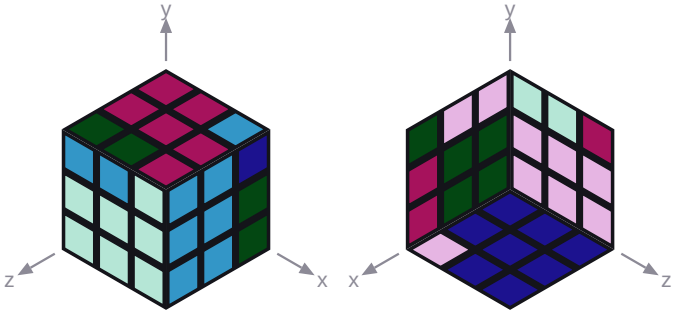

1. y right antiorario

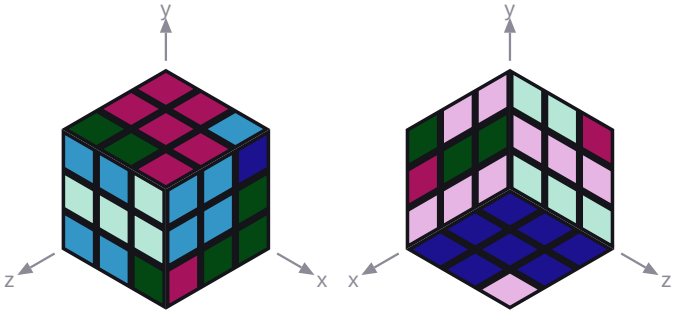

2. x top orario

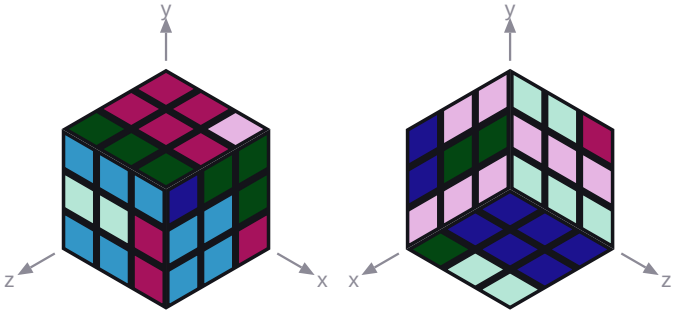

3. y right orario

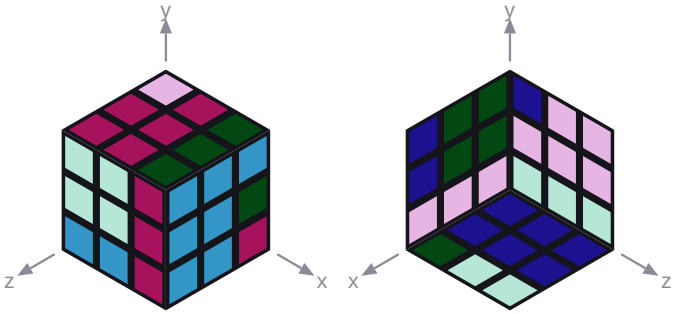

4. x bottom orario

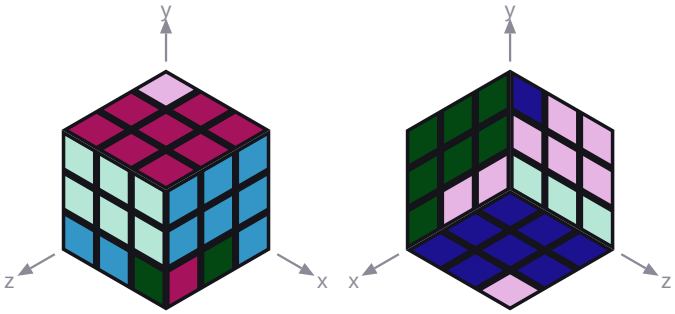

5. y right antiorario

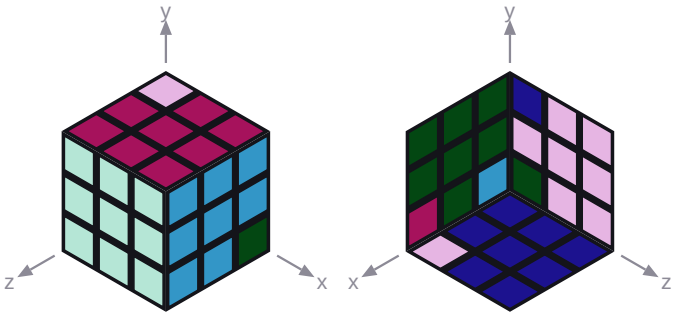

6. x top antiorario

7. y right orario

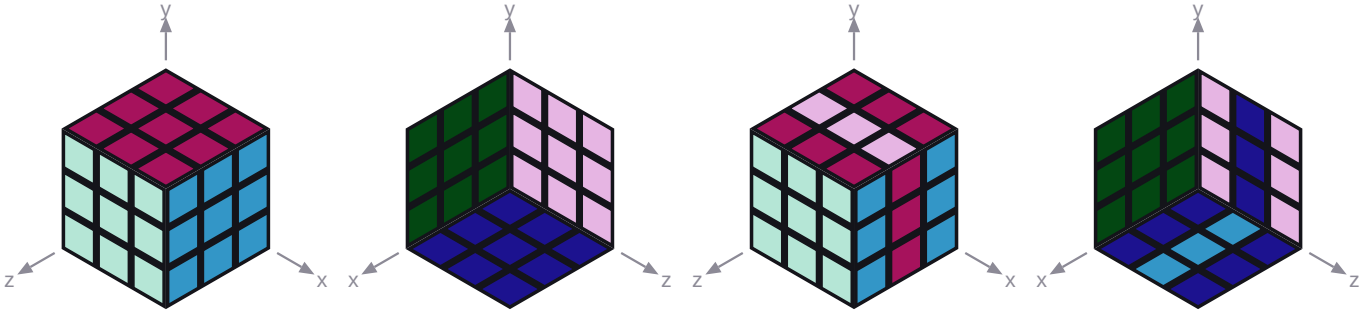

8. x bottom antiorario

Rubik Orbit · 2. Ciclo di 3 spigoli

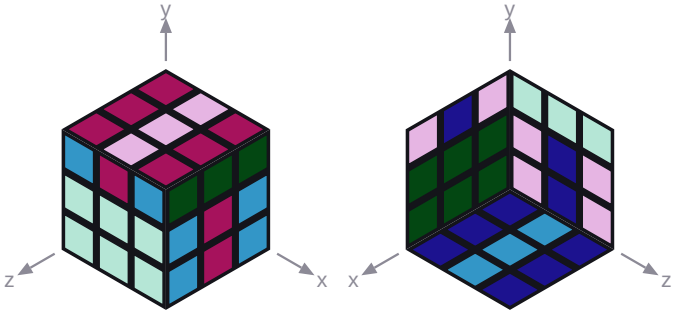

8 passi, 8 quarti di giro sulle orbite. A sinistra il cubo visto dal vertice tra x, y e z positivi (destra, sopra, davanti), a destra dal vertice opposto (sinistra, sotto, dietro).

Partenza

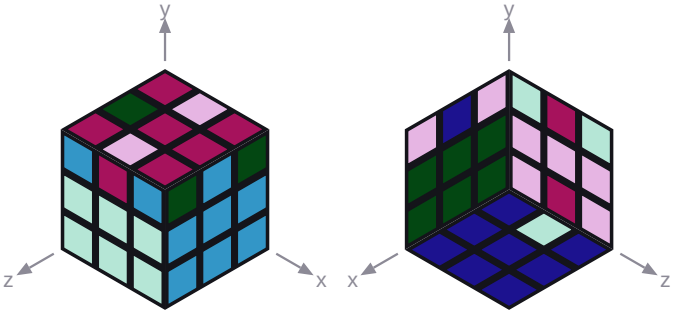

1. z center orario

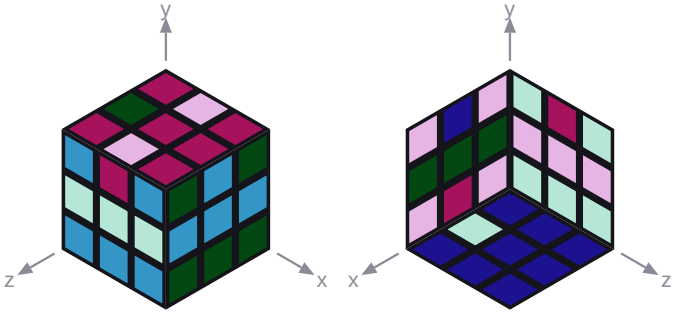

2. x top orario

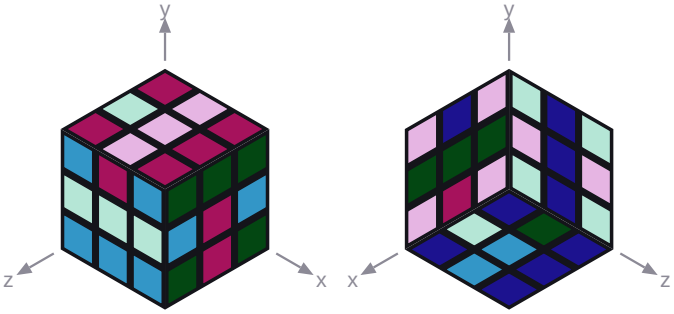

3. z center antiorario

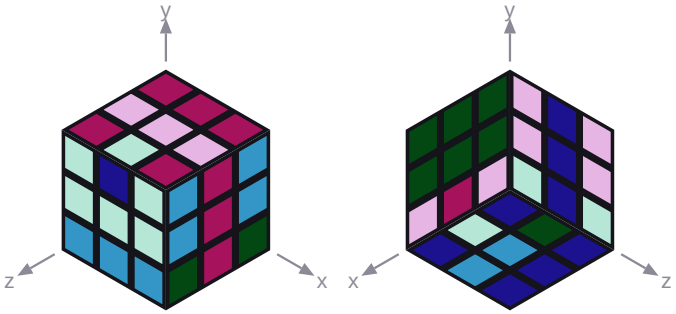

4. x bottom orario

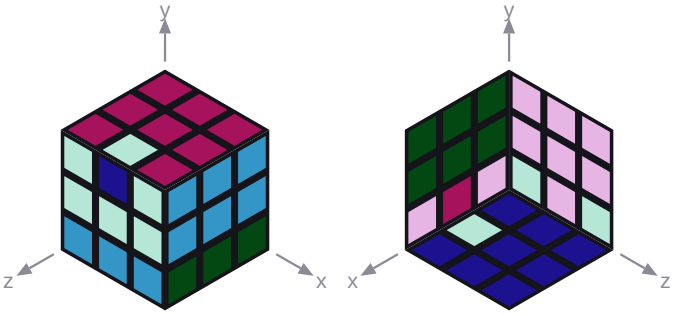

5. z center orario

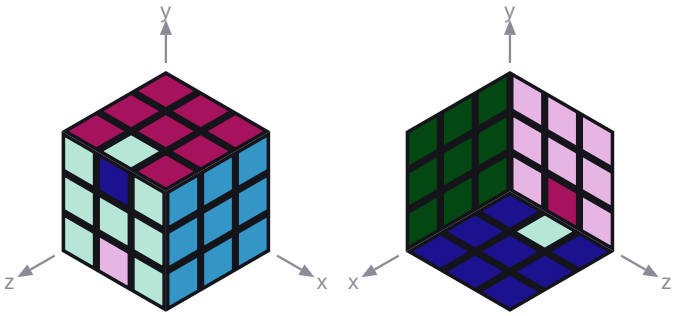

6. x top antiorario

7. z center antiorario

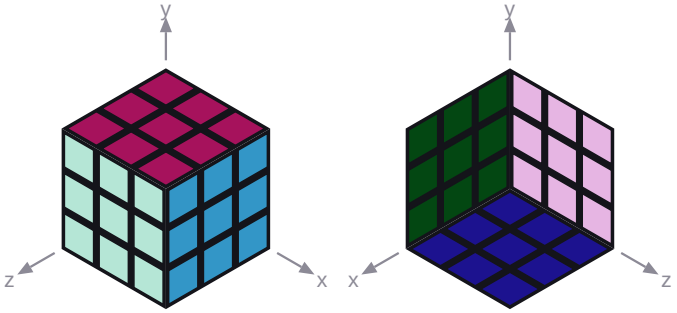

8. x bottom antiorario

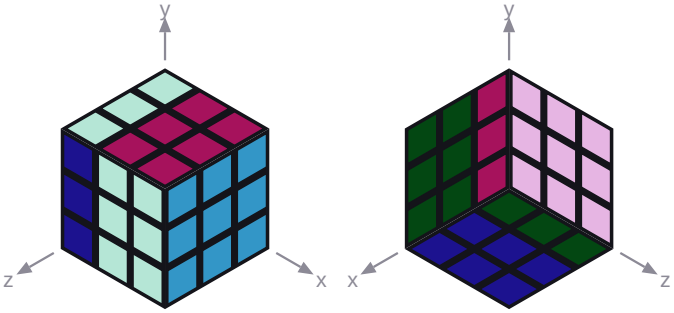

Rubik Orbit · 3. Ciclo di 3 spigoli a triangolo

10 passi, 10 quarti di giro sulle orbite. A sinistra il cubo visto dal vertice tra x, y e z positivi (destra, sopra, davanti), a destra dal vertice opposto (sinistra, sotto, dietro).

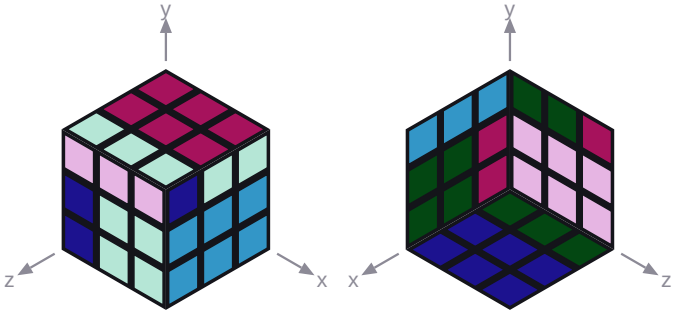

Partenza

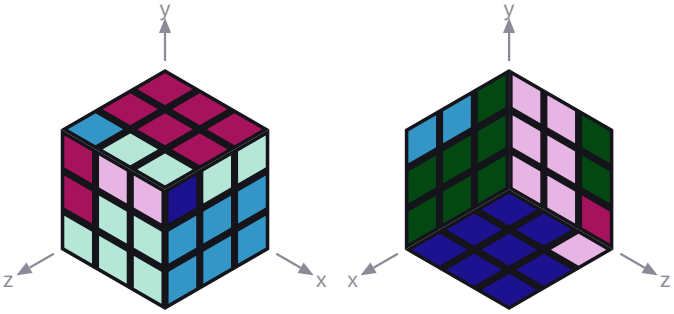

1. y left orario

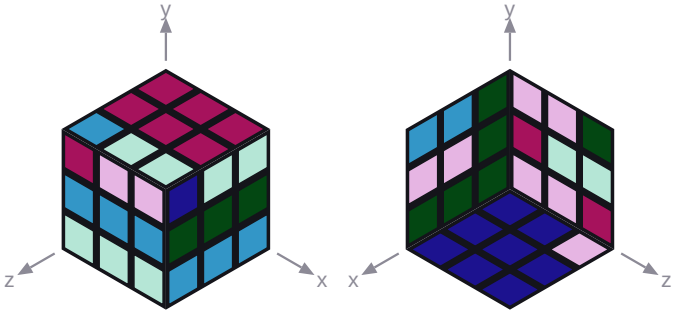

2. x top antiorario

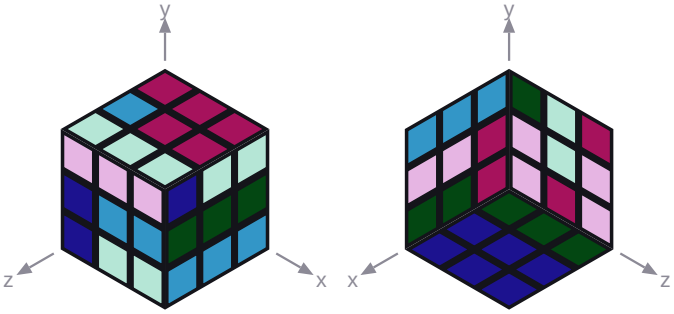

3. y left antiorario

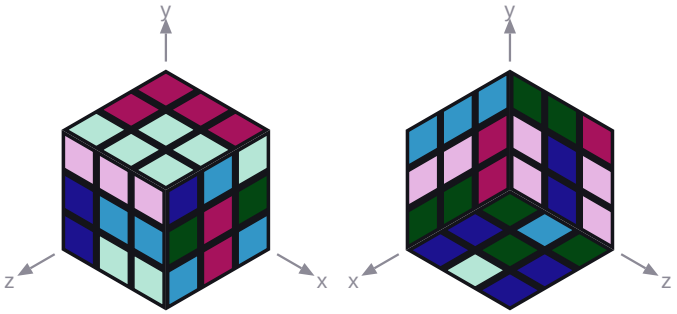

4. x center orario

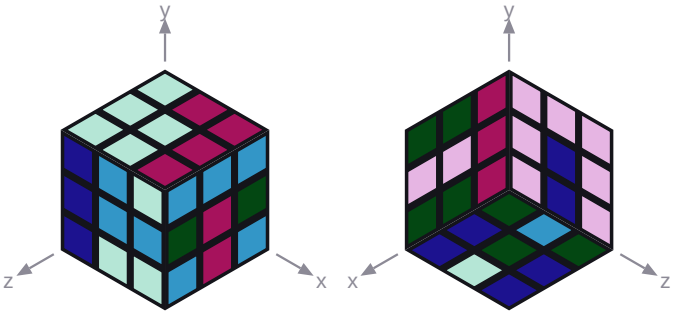

5. y left orario

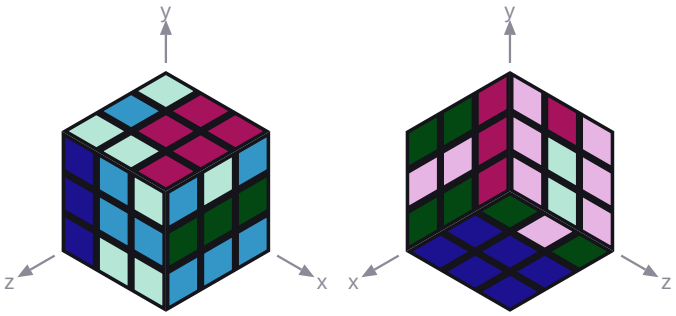

6. z center orario

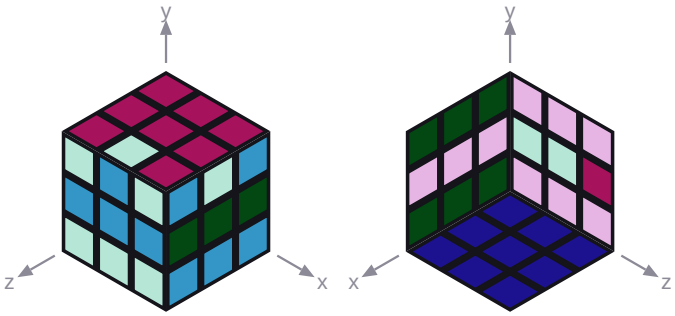

7. x top orario

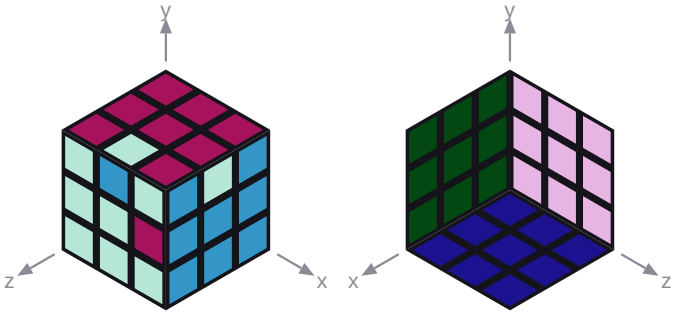

8. z center antiorario

9. y left antiorario

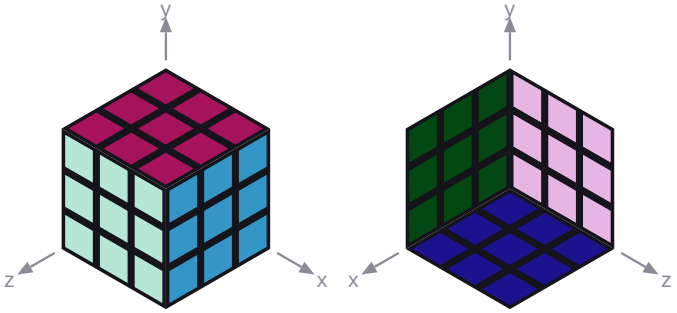

10. x center antiorario

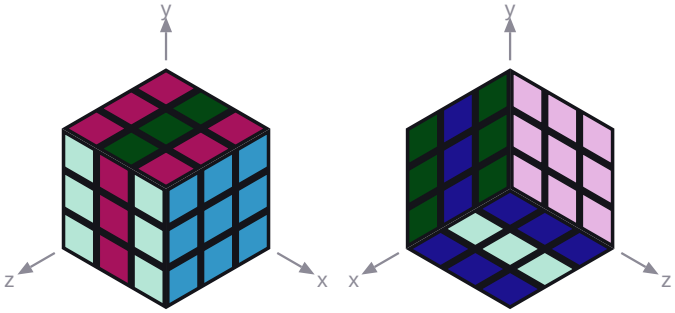

Rubik Orbit · 4. Capovolgere due spigoli vicini

16 passi, 16 quarti di giro sulle orbite. A sinistra il cubo visto dal vertice tra x, y e z positivi (destra, sopra, davanti), a destra dal vertice opposto (sinistra, sotto, dietro).

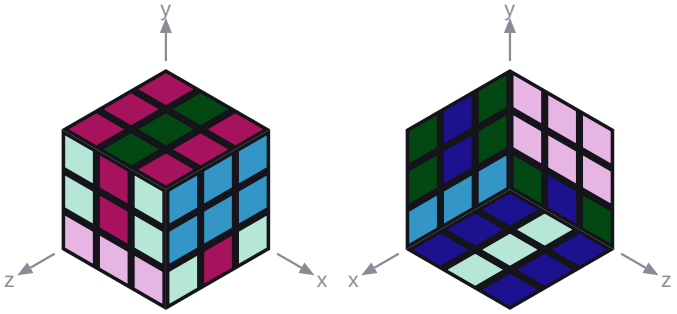

Partenza

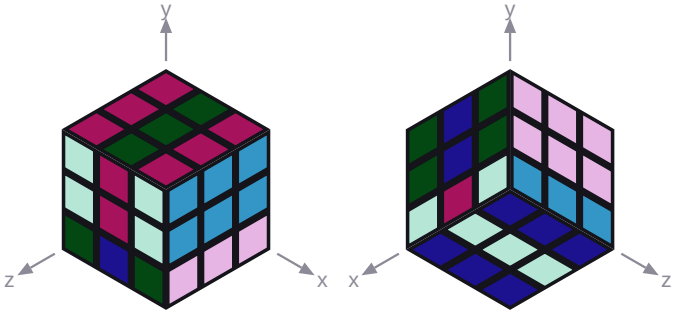

1. y center antiorario

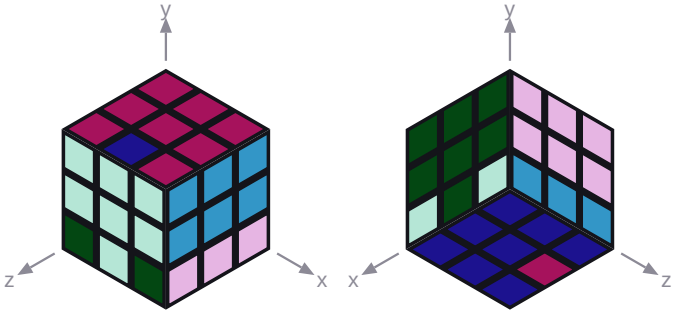

2. x bottom antiorario

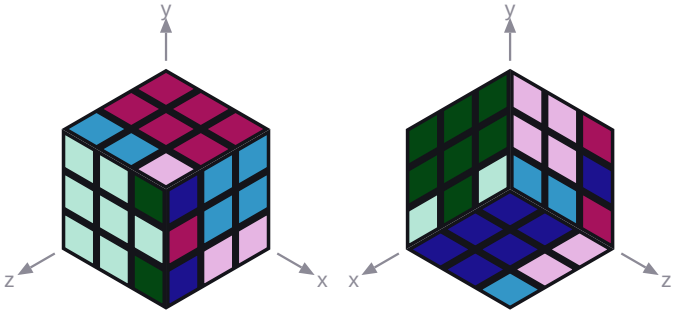

3. x bottom antiorario

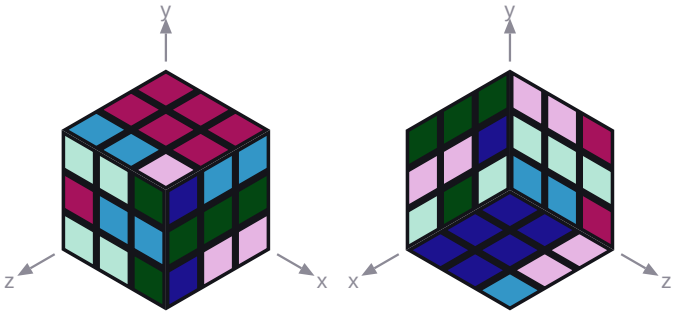

4. y center orario

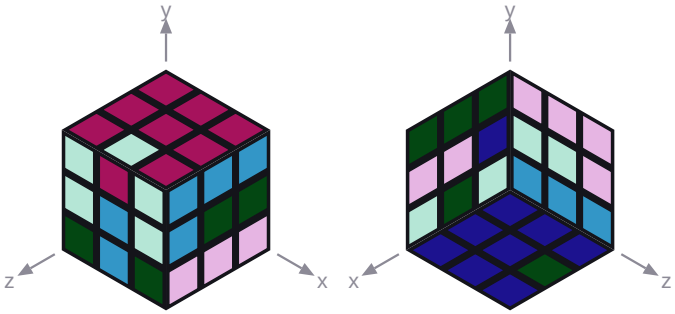

5. z left antiorario

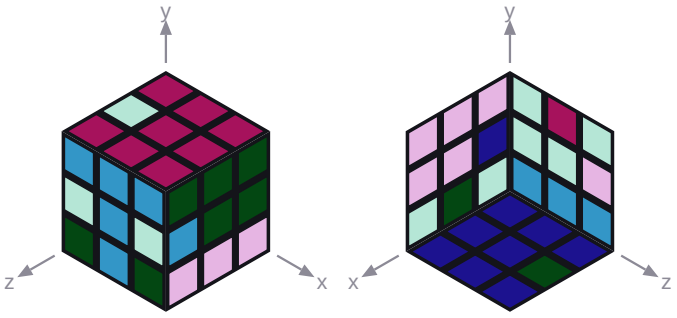

6. x center orario

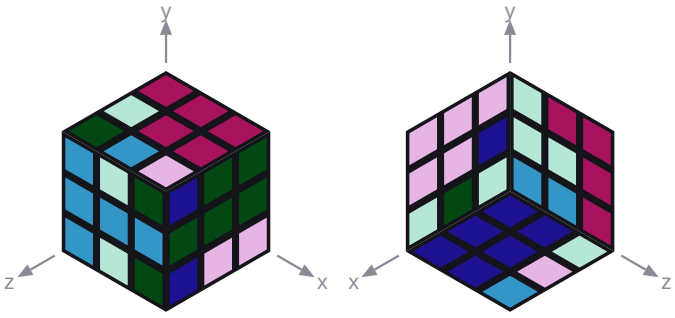

7. z left orario

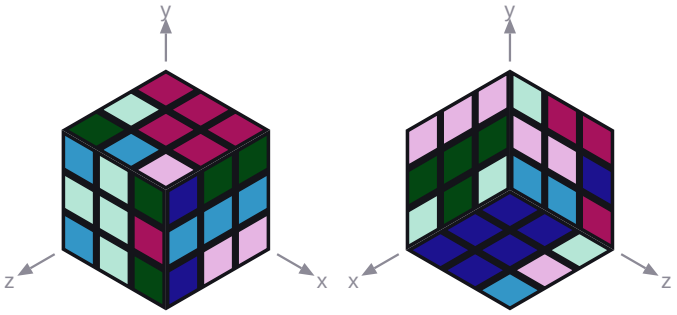

8. x top orario

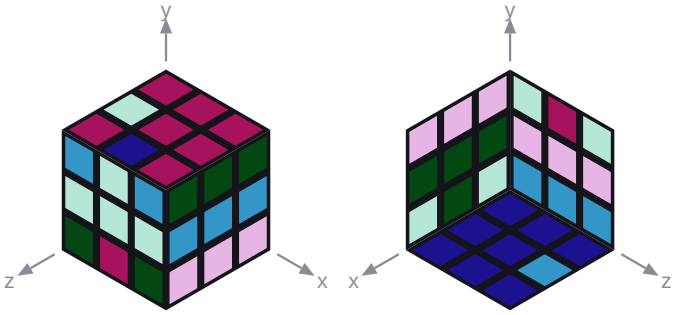

9. z left antiorario

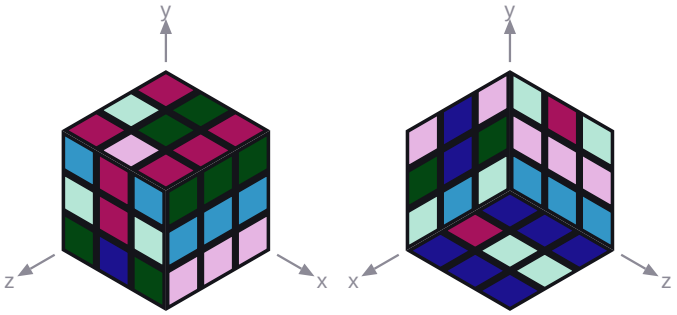

10. x center antiorario

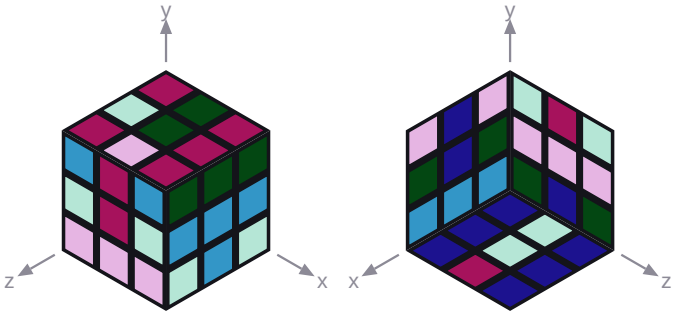

11. z left orario

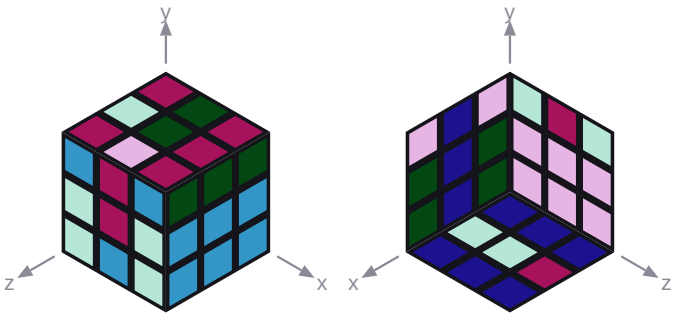

12. y center antiorario

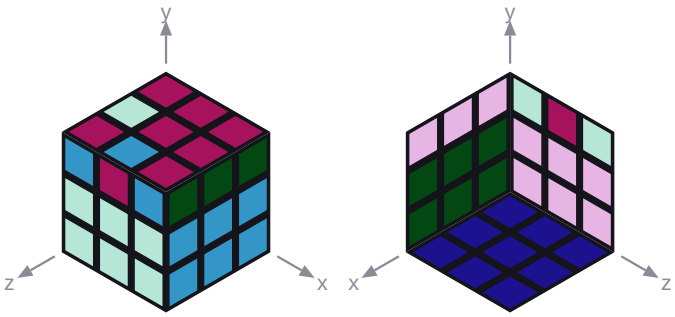

13. x bottom orario

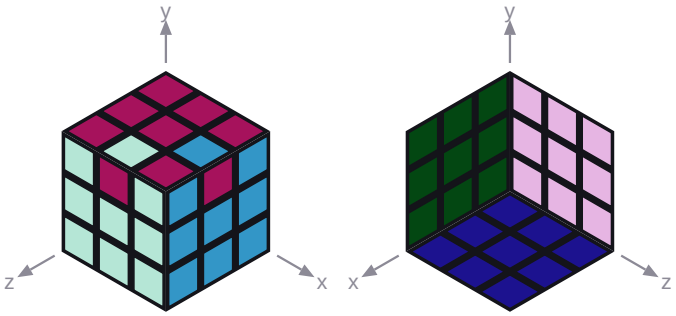

14. x bottom orario

15. y center orario

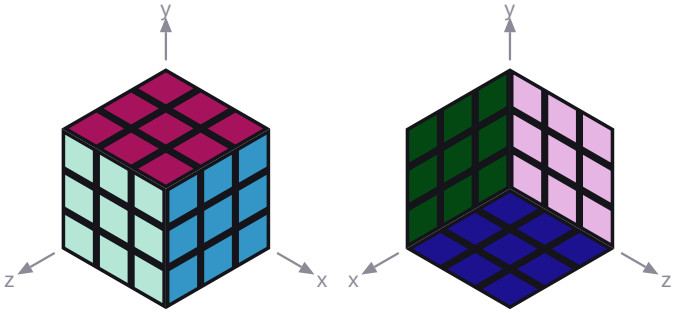

16. x top antiorario

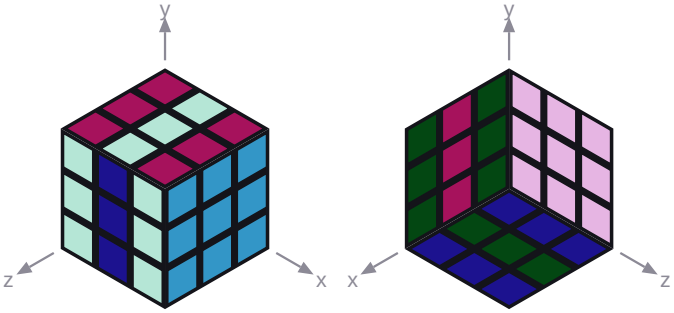

Rubik Orbit · 5. Capovolgere due spigoli lontani

20 passi, 20 quarti di giro sulle orbite. A sinistra il cubo visto dal vertice tra x, y e z positivi (destra, sopra, davanti), a destra dal vertice opposto (sinistra, sotto, dietro).

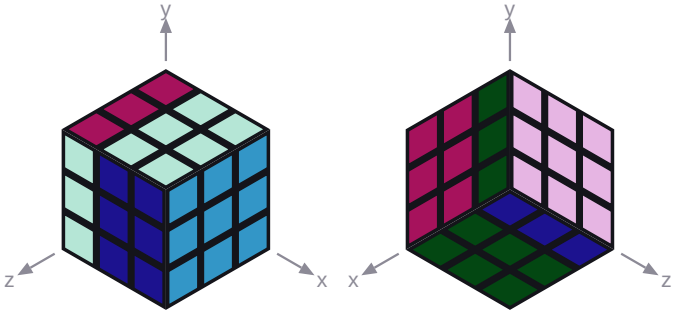

Partenza

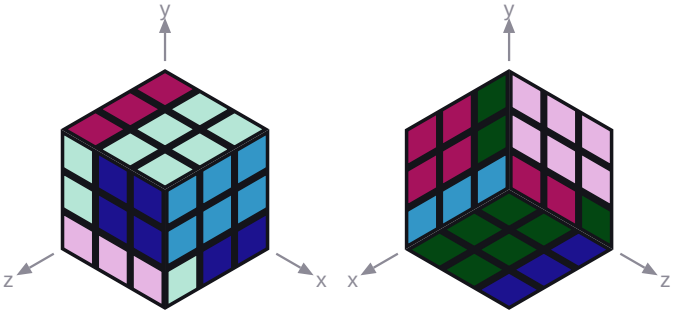

1. y center orario

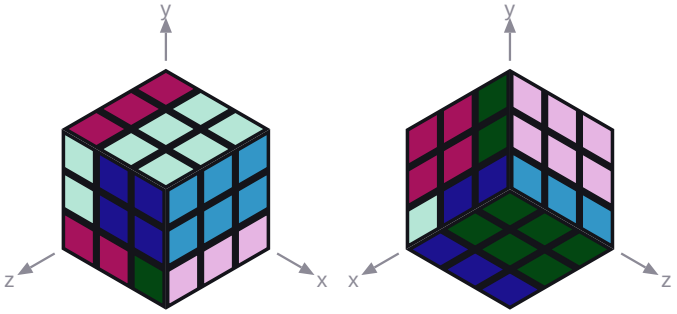

2. y right orario

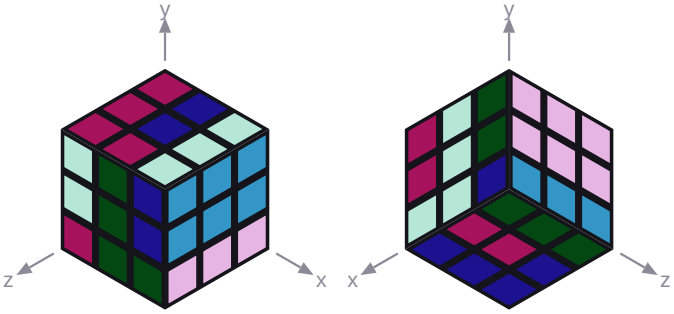

3. x bottom antiorario

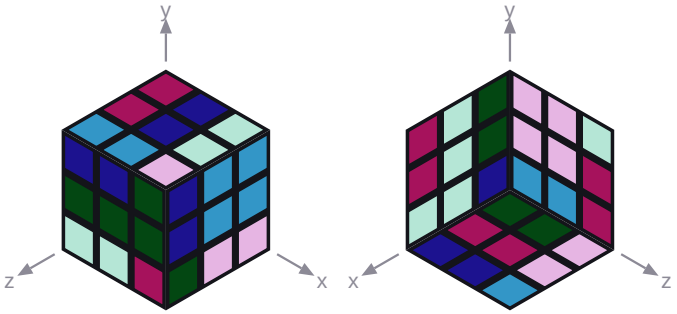

4. x bottom antiorario

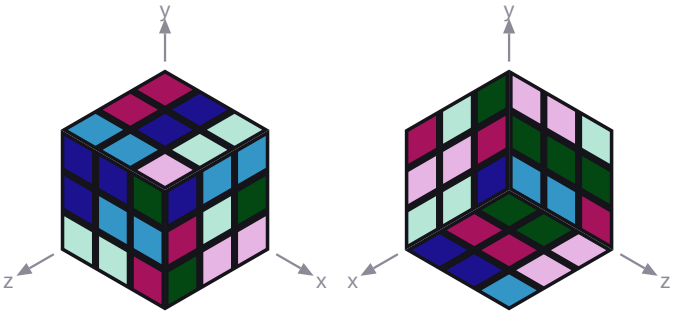

5. y center orario

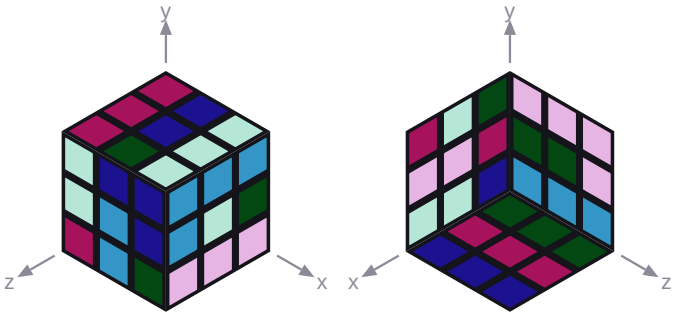

6. z left antiorario

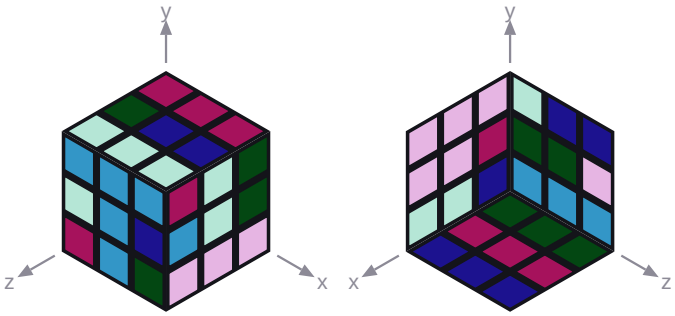

7. x center orario

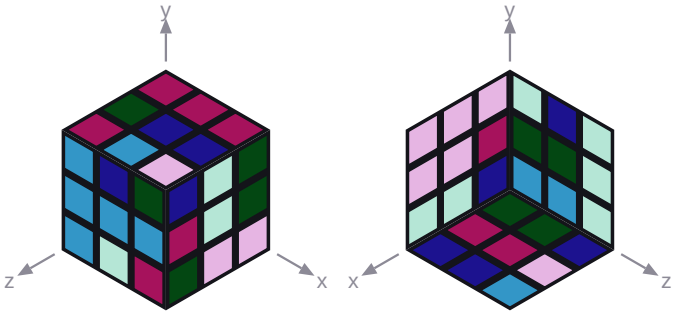

8. z left orario

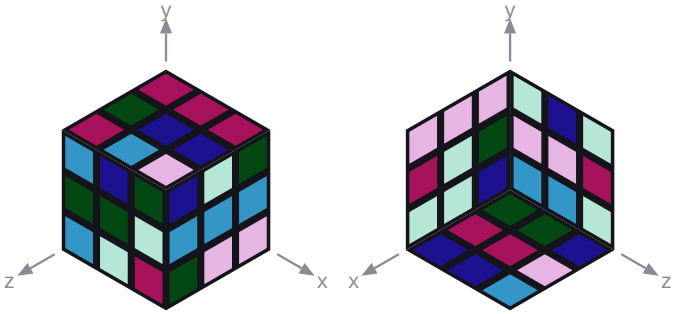

9. x top orario

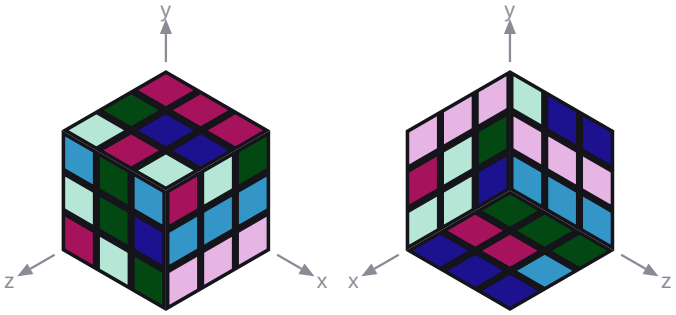

10. z left antiorario

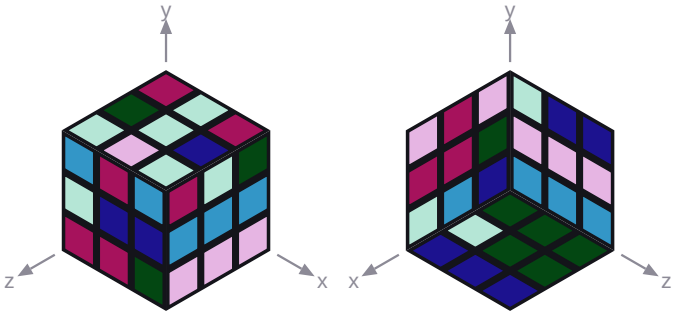

11. x center antiorario

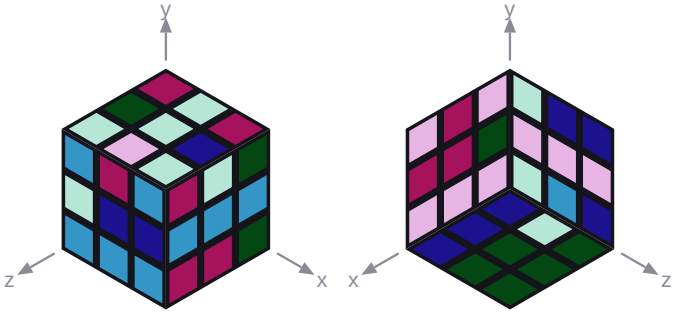

12. z left orario

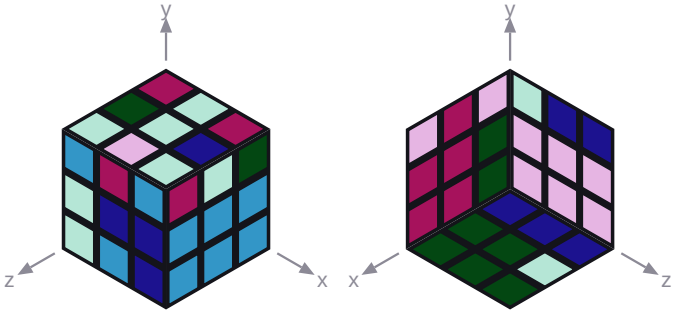

13. y center antiorario

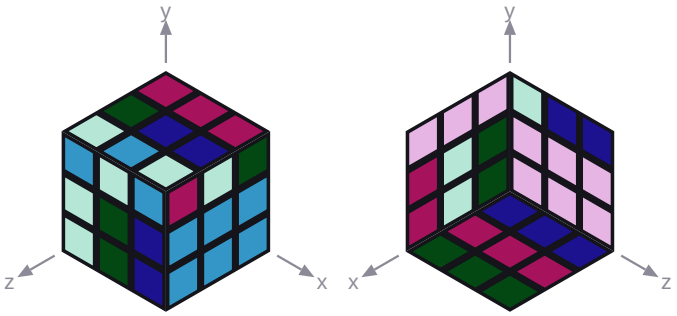

14. x bottom antiorario

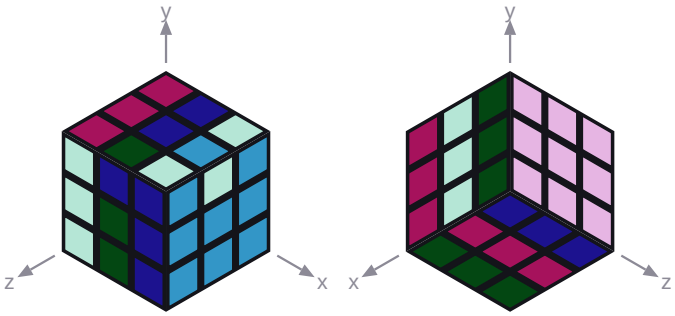

15. x bottom antiorario

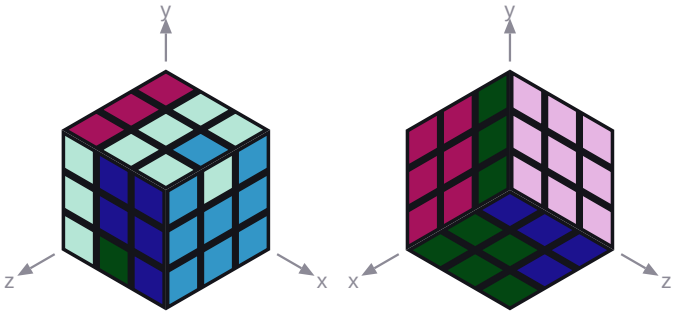

16. y center orario

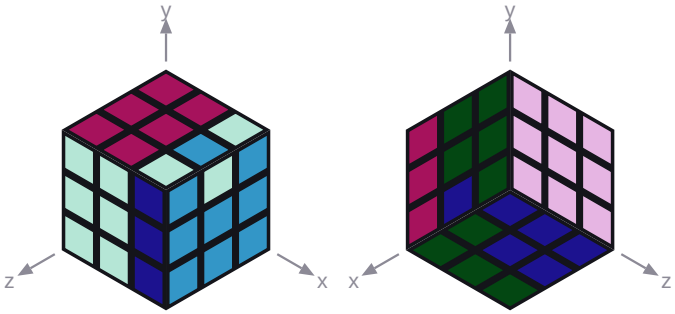

17. x top antiorario

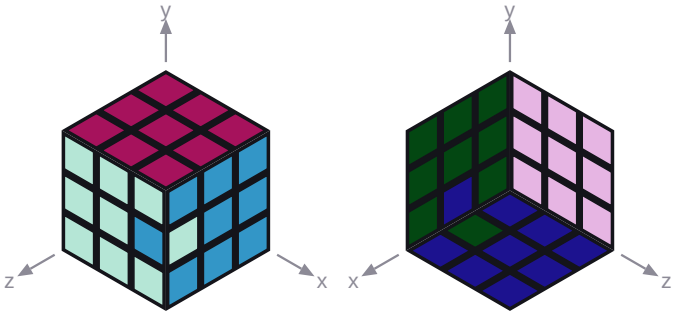

18. y center antiorario

19. y center antiorario

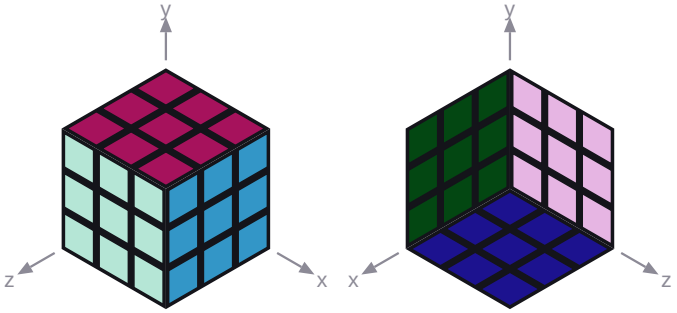

20. y right antiorario

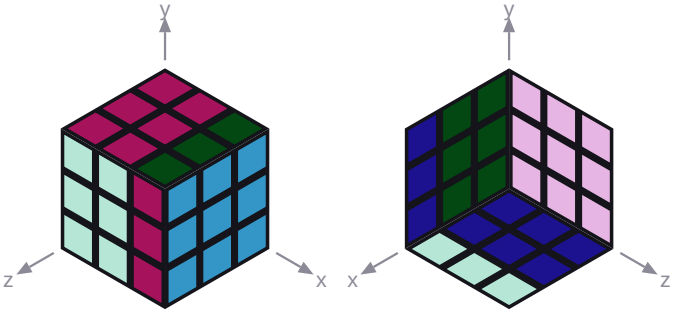

Rubik Orbit · 6. Ruotare due angoli

18 passi, 18 quarti di giro sulle orbite. A sinistra il cubo visto dal vertice tra x, y e z positivi (destra, sopra, davanti), a destra dal vertice opposto (sinistra, sotto, dietro).

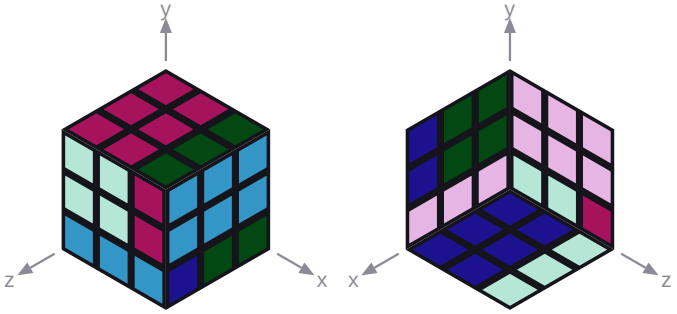

Partenza

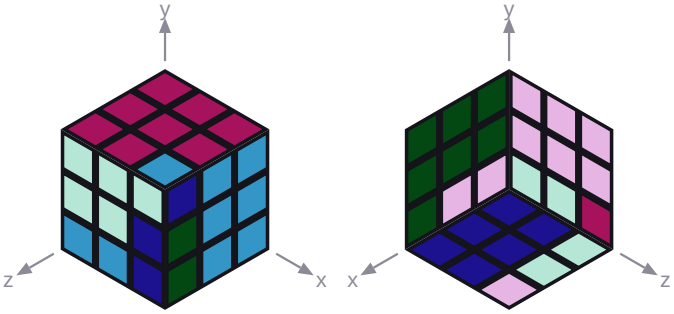

1. y right antiorario

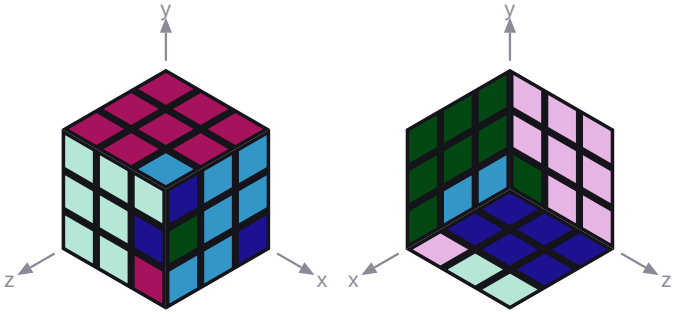

2. x bottom orario

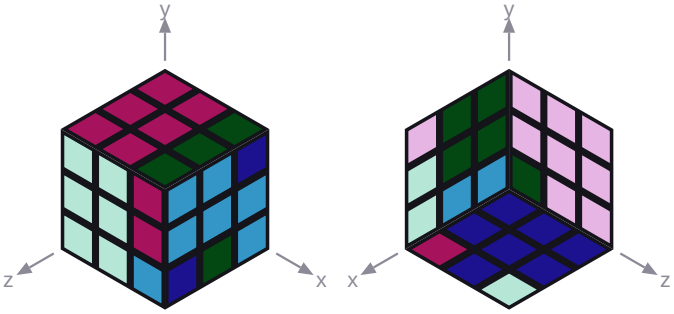

3. y right orario

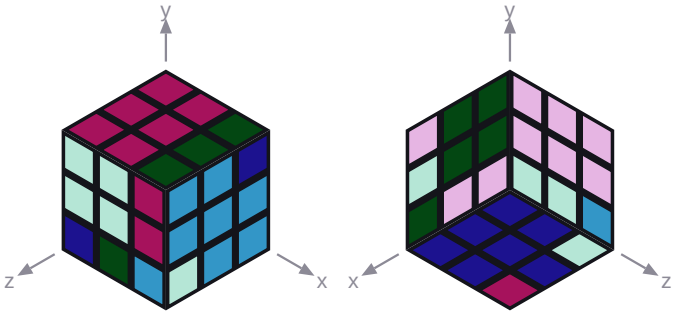

4. x bottom antiorario

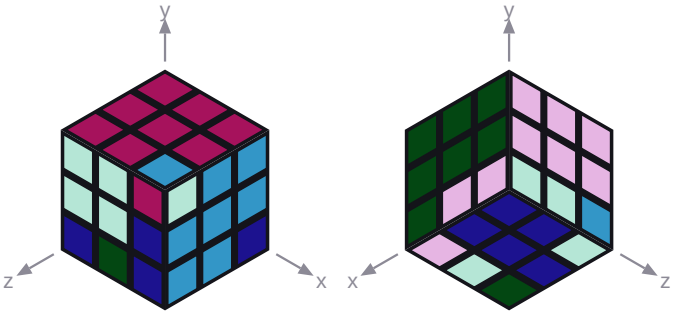

5. y right antiorario

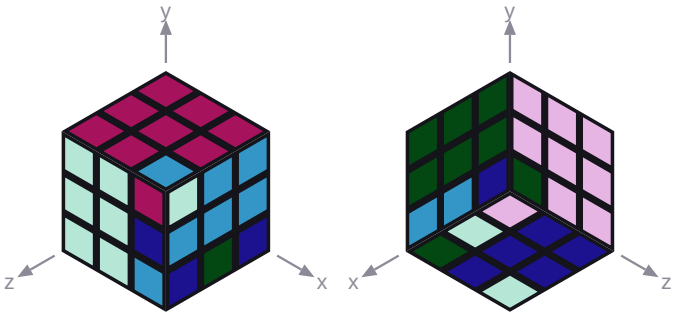

6. x bottom orario

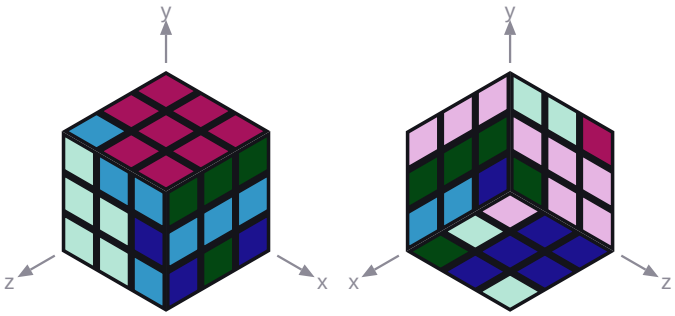

7. y right orario

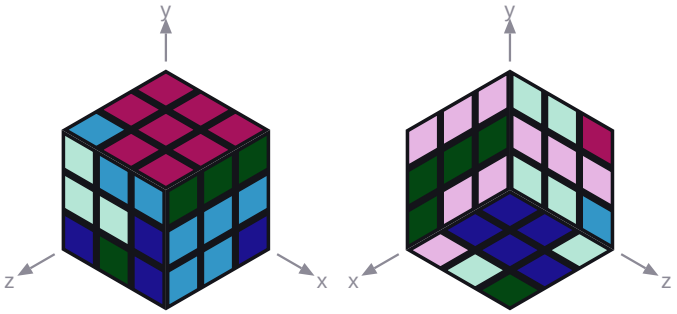

8. x bottom antiorario

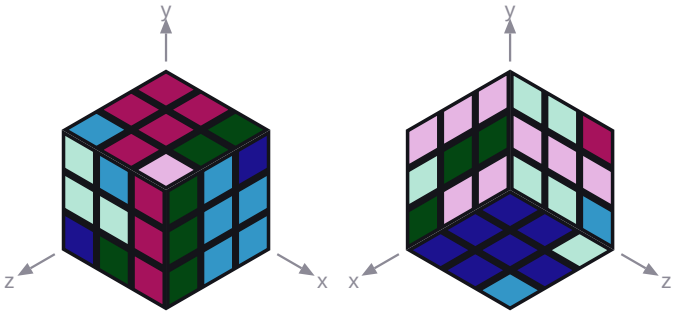

9. x top orario

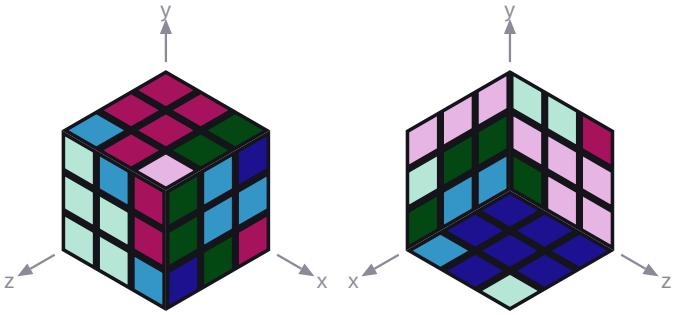

10. x bottom orario

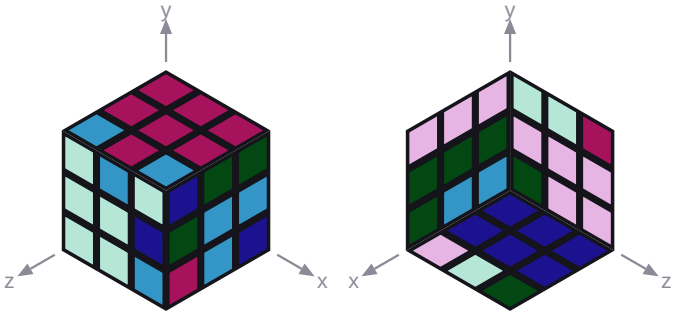

11. y right antiorario

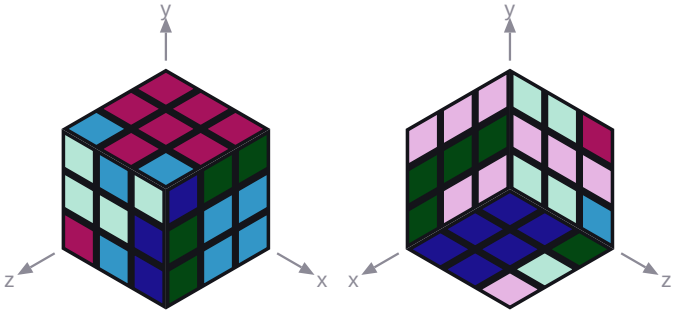

12. x bottom antiorario

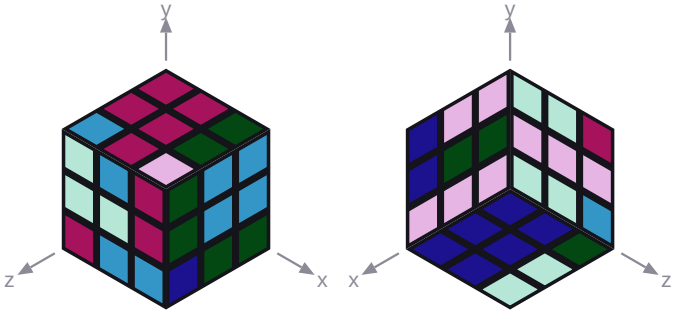

13. y right orario

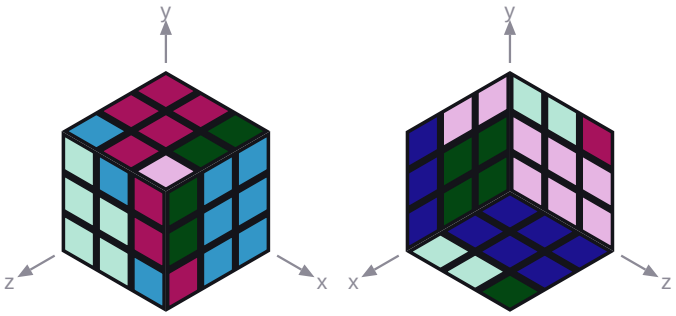

14. x bottom orario

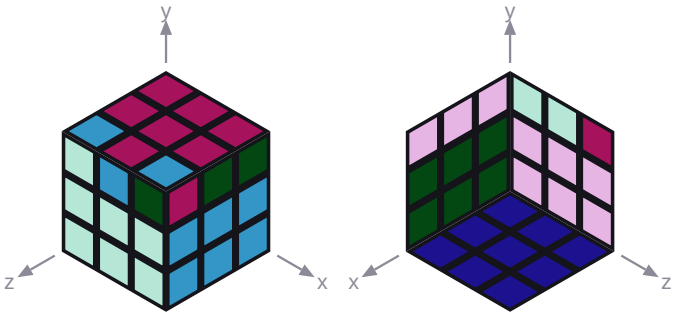

15. y right antiorario

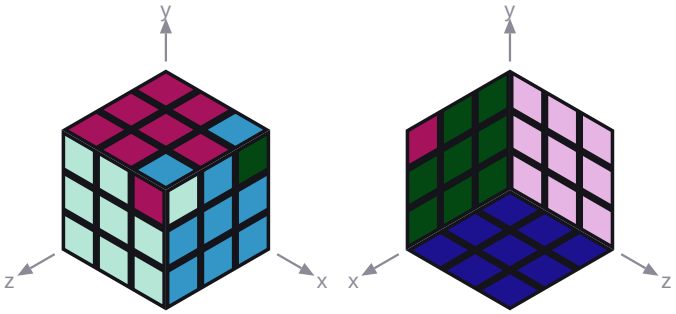

16. x bottom antiorario

17. y right orario

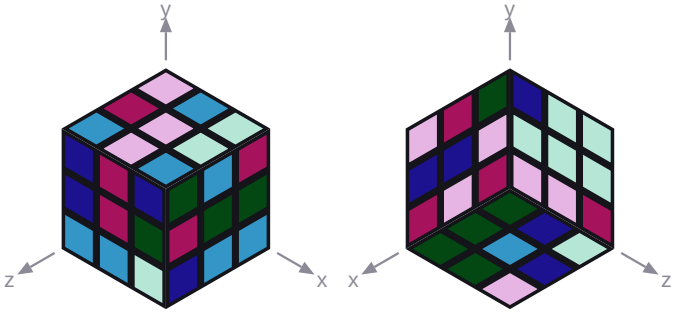

18. x top antiorario

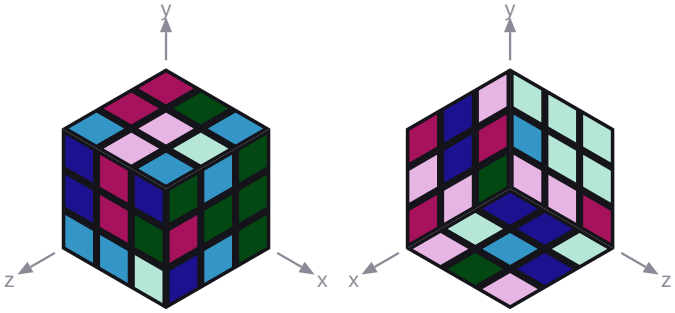

Rubik Orbit · 7. Soluzione più corta (esempio della guida)

6 passi, 6 quarti di giro sulle orbite. A sinistra il cubo visto dal vertice tra x, y e z positivi (destra, sopra, davanti), a destra dal vertice opposto (sinistra, sotto, dietro).

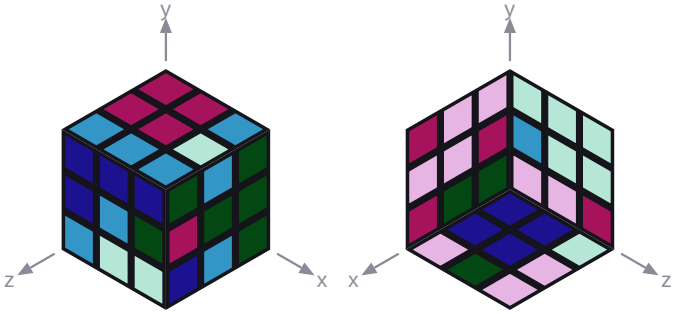

Partenza

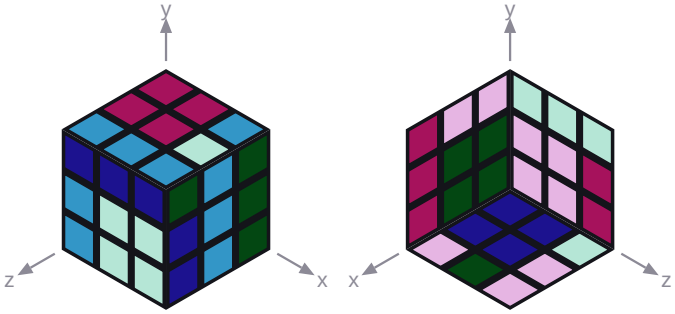

1. z right antiorario

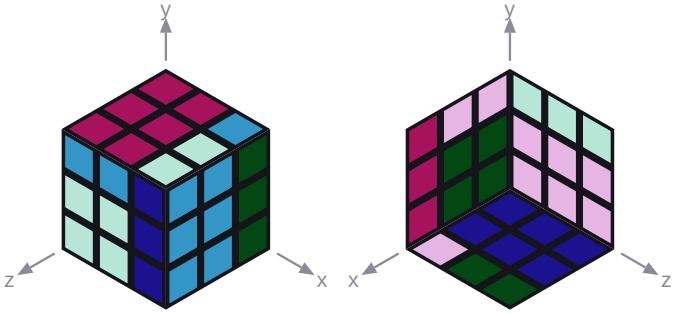

2. y center orario

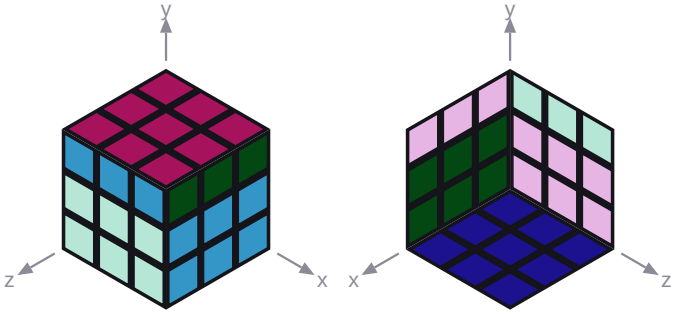

3. x center antiorario

4. z left orario

5. y right antiorario

6. x top antiorario
